

PROFILE

Creative Circus graduate, owner and operator of Pixels and Wood, roller girl, and general speed demon.

I'm a MacGyver type who knows how to use a torque wrench, make paper from scratch and bring ideas to life. I've always been one to tinker and figure things out, so it was inevitable that I'd end up in a career where I get to create all day. I love to be challenged and feel that design is an ever evolving passion that takes many forms.
